Introduction of Wooscreen

Wooscreen, manufacturer of transparent glass LED display, suspends the LED chips between two sheets of glass, which can show either videos or customized patterns floating in space like magic. Our core technology is to electrify the chip on the conductive glass through the method of laser ablation.

Factory Profile

Wooscreen has a strong R&D team equipped with top-ranking production equipments. Our factory covers around 10,000M² with the production capacity of 300m² per day. Wooscreen has impressed the market with most innovative technology and has gained more than 10 national patents.

Equipments

Automatic Dispenser

SMT Machine

Laser Engraving

Washing Line

Autoclave

Product Series

We have now launched three series of products: color dynamic series, mono dynamic series and LED lighting glass, which can be applied to: building facades, facilities landscaping, airport signage, shop windows, partition, etc.

- **Cloro Dynamic Series**

S series (P58,P30)

The series emphasize on super transparency, more than 90% light transmission, which ensures architectural integrity and breaks through the limitation of traditional LED display.

Series	Pixel Pitch	Panel Size	Pixel Density	Transparency
S series	58mm	Min 930x600mm Max 930x3000mm	320/M ²	>90%

D series (P16,P10)

D series products attract customers with vivid videos and pictures displaying performance and its high luminance at around 7000nits.

Series	Pixel Pitch	Panel Size	Pixel Density	Transparency
D series	16mm	Min 300x300mm Max 1800x3800mm	3906/M ²	>40%

- **Mono Dynamic Series**

Mono dynamic series are mainly applied in the expression of animation, text, signs and simply videos. Selected single color is also capable of expressing well the product's clarity and simplicity.

Series	Pixel Pitch	Panel Size	Pixel Density	Transparency
Mono Dynamic Series	34mm	Min 830x600mm Max 830x3000mm	768/M ²	>90%

- **LED Lighting Glass**

Clients can randomly pick colors out of red, yellow, blue, green, white, pink, purple and orange. The customized fixing series can primarily be applied in company logo, brand promotion and other marketing application. The color changing series will amaze you with gorgeous effects. It is the best choice in decoration needs.

Series	Pixel Pitch	Panel Size	Pixel Density	Transparency
LED Lighting Glass	Min 7mm	Customized	Customized	90%

Product Composition

Wooscreen glass display is composed of ITO conductive glass, glass panel and LED chip. We use laser to sculpture the circuit to realize image, animation, text and video playing.

Product Features

-  Architecture Integrity
-  High Light Transmittance
-  Media Broadcasting
-  Minimum Heat Generation
-  Environmental Friendly
-  Low Power Consumption
